

R&D mission and activities

From R&D to commissioning

With a 50-year history of delivering high performance operating units and process lines, we have developed a smart and optimized project management methodology.

Your project is in good hands at Applexion!

R&D mission and activities

From R&D to commissioning

Our R&D teams work on more than 20 processes each year. They measure and characterize the critical parameters of your process with screening and feasibility studies. If necessary, we can transfer your analytical methods or develop new ones.

YOUR EXPERIENCE

- Minimize experiments based on expertise and methodologies
- Optimize gathered data for process development VS available raw material
- Increase progressively the accuracy of technical & economical estimations
- Obtain representative samples at early stage (kg VS kTon)
- Derisk process scale-up by stage-gate approach

	LAB	PILOT	PROCESS DESIGN	ENGINEERING	UNIT OR PLANT BUILDING	COMMISSIONING
Technical Feasibility Studies	█					
Samples production (10g - 200kg)		█				
Toll manufacturing			█	█	█	█
Membrane & Resin expertises	█	█				█
Pilot Rental / Assistance		█	█	█	█	█
Plant Support / Troubleshooting				█	█	█
