

KA membranes
XA resins

Consumables management to ensure the daily performance

Select the most adapted consumables for your process. Follow the aging of the consumables and order new ones on time for replacement.

Consumables management to ensure the daily performance

YOUR BENEFITS

PEACE OF MIND

Select the adapted consumables for your process, follow the aging of the consumables and order new ones on time to replace them at the right moment.

R&D TESTED

Optimize your process and reduce wastewater as well as chemicals and water consumption.

A WIDE PORTFOLIO

YOUR EXPERIENCE

INDUSTRIALLY USED

Thanks to our 30-year experience, with more than 20 000 m³ of resins loaded and over 300,000 ceramic membranes installed, you will get the best experts by your side.

RELIABLE

Indeed, each XA resin is selected thanks to a strict benchmark and extensive analysis of its behavior under industrial conditions. We also make sure that each XA resin has an extended lifetime, compatible with intensive industrial activities. This expertise, combined with laboratory and pilot plant evaluation, enables us to provide best-in-class resins specifically adapted to your application.

GUARANTEED PERFORMANCES

KA membranes are designed with the best balance between filtration surface, hydraulic diameter, chemical resistance and mechanical robustness. And our organic membranes are cost-effective organic spiral nanofiltration membranes, highly resistant and specifically adapted for industrial processes.

XA Resins

2 TYPES OF CONSUMABLES

KA membranes & Organic membranes

Applexion provides:

1. Resins & membranes analyses services
2. Resins & membranes supply and replacement

 **Applexion**
beyond purification
